We are proud to introduce the Eventide Spring Reverb – a new plug-in for desktop and iOS. Spring models the sound and character of the popular artificial reverbs found in guitar amplifiers. It also goes a step further by allowing access to physical parameter controls not readily available in a real spring tank.

Content of this Press Release:
- Spring models the sound and character of the popular artificial reverbs
- control the amount of "springiness"
- includes tremolo, a tube amp style tremolo

Rangsdorf, 16th January 2020 - By tweaking these parameters, Spring can create faithful representations of real springs or push the physical boundaries to achieve new distinctive sounds. The Tension [TNSION] and Num Springs [NUMSPR] knobs work in concert to control the amount of "springiness" in the processed sound. Additional adjustable parameters include Resonance and Low and High damping. The beloved performance controls made popular in Eventide's Blackhole, UltraTap and MangledVerb plugins are also available – Ribbon allowing users to program two settings for any combination of the controls and seamlessly transition between them while the programmable HotSwitch an instantaneous jump to an alternate setting at the push of a button.

Spring also includes Tremolo – a tube amp style tremolo – to further nuance or exaggerate guitar tone with fun and intuitive controls. Tremolo can be inserted pre- or post-reverb for an even wider range of tonal options and sound exploration.

EUROPEAN MUSIC DISTRIBUTION

About the Company Sound Service GmbH

Founded in 1983, the Berlin based Sound Service GmbH has been growing steadily from a one-product-distributor (MFB Fricke; the world`s first digital drummachine) to one of the major independent german distribution companies for musical instruments recording studio equipment and PA, Lightning and DJ products. Today Sound Service is one of the leading distribution companies in Europe with exclusive distribution rights for a lot of the A-List MI-brands covering most of the countries in Europe.
