

## PRESS RELEASE

### Eventide announces new Riptide Effect Pedal

Eventide Audio introduces the new Riptide effect pedal. Riptide is the result of extensive research into the iconic Uni-Vibe and legendary overdrives. Whether you're looking to ride the slow, vibey waves of lush modulation or dive headfirst into the pulsing depths of overdrive, Riptide invites you to play with power and attitude that's unapologetically bold. Riptide features not one, but two distinct voices for each effect, all delivered in glorious stereo. Plus, you can effortlessly transition from Drive into Vibe or Vibe into Drive. Let 'er rip.

The Eventide Riptide will be shipping in November 2023.

- Technical specifications

**Berlin, 11th of October 2023** – We are delighted to present the Eventide Riptide, a combination of a stereo dual-voice Drive and Uni-Vibe in One. With stereo Overdrive and Vibe, each effect features dual voicings versatile enough for funky bright tones to explosive and warm lead tones.

#### Two Colors of Drive

Riptide features a balanced distortion with superb dynamics and touch sensitivity. Green is a dynamic, mid-range crunch. Red is a smooth and boosted overdrive.

#### Two Colors of Vibe

Authentic Shin-ei Uni-Vibe emulation captures the richness and modulation of the original, in stereo!

Green is the traditional Uni-Vibe. Red is a deeper, phase-y Vibe.

#### Features:

- Four Effects: 2 Overdrives, 2 Uni-Vibes
- Drive ⇌ Vibe at the press of a button

### Free Eventide Device Manager software

The Eventide Device Manager (EDM) is a software application for Mac and PC and provides settings and preset management for Dot9 pedals and Rose. Unlocking the full potential of Rose and Dot9 pedals (Blackhole, MicroPitch Delay, UltraTap, Tricera Chorus, Riptide) is easy with EDM. Connect the pedals via the USB (mini-B) port to your computer for direct access to all functionality. EDM software allows users to control every parameter in a digital realm: Install software updates, create and manage presets, set up MIDI, and backup/restore the device. Effortlessly make changes to the pedals by auditioning and experimenting with different sounds directly from the software.
