

## Studiologic releases new OS 2.0 for Numa Compact 2 / 2X

Studiologic releases a massive update for their Numa Compact 2 and 2x!  
The firmware 2.0 for Numa Compact 2 and Numa Compact 2x introduces tons of new features and improvements.  
We are very excited as this update comes from users' feedback so a special thanks goes to the whole Studiologic community!

### Content of this Press Release:

- NEW NAVIGATION SYSTEM
- A NEW WAY TO USE SLP3-D
- SUPER POWER FOR ORGAN SOUNDS
- UX REFINEMENTS
- IMPROVEMENTS UNDER THE HOOD
- GET THE UPDATE

**Berlin, 13th of February 2023** – Studiologic updates the Firmware of their highly acclaimed Numa Compact 2 and Numa Compact 2X Stage Pianos.

### NEW NAVIGATION SYSTEM

Numa Compact 2 can combine 2 audio parts and 2 MIDI zones at the same time. The new firmware includes a revamped navigation system that allows to separate the Focus from the on/off control of the audio parts and the MIDI Zones.

- \* Press SOUND to show the UPPER and LOWER parts on the display.
- \* Press MIDI to show Zone A and Zone B on the display.
- \* Press LOWER (MIDI A) and UPPER (MIDI B) to enable or disable the audio parts and the MIDI zones.
- \* When the SOUND button is on, press it to move the focus from UPPER part to LOWER part and vice versa.
- \* When the MIDI button is on, press it to move the focus from Zone A to Zone B and vice versa.
- \* Press the Encoder to move the focus to the Program. A second press of the Encoder shows the Programs list.

The new navigation system is optional and you can apply it by selecting Advanced from the GLOBAL EDIT menu. The Standard system remains by default even after the update.

### Overview

#### Facts

- Studiologic releases new firmware 2.0 for Numa Compact 2 and Numa Compact 2X
- New navigation system
- Improved Organ section
- UX refinements
- Available as free download

#### Product name

Numa Compact 2  
Numa Compact 2X

#### Brand

Studiologic

#### Distribution

Sound Service GmbH  
UK: Sound Service MSL  
Distribution Ltd

#### Website

### A NEW WAY TO USE SLP3-D

You can now use the SLP3-D triple pedal to change the current Program. Connect the SLP3-D to the PED 2 jack and choose SLP3D-PRG from the settings. The left and center pedals will browse Programs back and forth while the right pedal will work as Damper.

### SUPER POWERS FOR ORGAN SOUNDS

The new firmware introduces new settings to customize organ sounds even more in detail. Try it out to get your own unique and personal sound.

#### Leakage

The Leakage parameter simulates the typical effect of electromechanical generators, which have residual components due to the proximity of the Tonewheel and to the dispersions in the wiring.

#### Organ model

The new Organ model option allows to choose between a Modern model, very balanced and sinusoidal, and a Vintage model, enriched with more harmonics. The Organ Model can be differently set for each Program in the related menu.

#### Rotary

The new Rotary Max Speed control allows to choose between 3 different settings ( MIN / MED / MAX ) , based on the three pulleys of the vintage tone cabinets. There are new options for virtual microphones which can be Mono (2 microphones) or Stereo (3 microphones) and placed Close or Far from the cabinet for a different modulation depth.

The new Overdrive parameter applies a tube distortion which, differently than the FX1 Drive, is independent from the section's volume and pedal, for a stable effect in any parts mix.

You can also choose to use a hold pedal to control the speed of the Rotary speed.

With FX Autoset On and Rotary, this function is activated automatically, to work when you need it. Or set it manually for each part GLOBAL EDIT ? PEDAL 2, after turning off FX Autoset.

Here is a summary of where to find the new features:

| New feature              | Menu location         | Numa Compact 2 | Numa Compact 2x |
|--------------------------|-----------------------|----------------|-----------------|
| Navigation system        | GLOBAL EDIT           | ✓              | ✓               |
| Program change by SLP3-D | GLOBAL EDIT → PEDAL 2 | ✓              | ✓               |
| Leakage                  | GLOBAL EDIT           |                | ✓               |
| Organ model              | PROGRAM EDIT          |                | ✓               |
| Rotary max speed         | GLOBAL EDIT           | ✓              | ✓               |
| Rotary overdrive         | PROGRAM EDIT          | ✓              | ✓               |
| Rotary mic position      | PROGRAM EDIT          | ✓              | ✓               |
| Rotary mic setup         | PROGRAM EDIT          | ✓              | ✓               |
| Rotary Slow/Fast         | PART EDIT → PEDAL 2   | ✓              | ✓               |

### UX REFINEMENTS

We know that an effective user interface makes all the difference on stage.

With the new Navigation system, disabled MIDI zones and audio parts are grayed out to distinguish them from enabled ones. And when you enable a MIDI zone or an audio part, the focus automatically moves to it.

The Numa Compact 2x sliders are 5x more responsive. As soon as you move them, the display follows in real time.

There are also new icons when you change one of the nine synth parameters with the sliders, for better feedback.

### IMPROVEMENTS UNDER THE HOOD

We have also worked hard on the things that you cannot see (but you can hear). The small "clicks" you might hear when adjusting the Mastering knobs or using USB Audio have been eliminated.

The Reverb and Delay effects have completely new DSP algorithms and the FX1 Drive control is now perfectly smooth.

You will notice other small improvements in all other effects.

### GET THE UPDATE

The update is free for all Numa Compact 2 and Numa Compact 2x owners.

To update follow the instructions:

- Numa Compact 2: [https://www.studiologic-music.com/support/articles/nc2\\_firmware/](https://www.studiologic-music.com/support/articles/nc2_firmware/)

### About the Company Sound Service European Music Distribution

Founded in 1983, the Berlin based Sound Service European Music Distribution has been growing steadily from a one-product-distributor (MFB Fricke; the world's first digital drummachine) to one of the major independent german distribution companies for musical instruments recording studio equipment and PA, Lightning and DJ products. Today Sound Service is one of the leading distribution companies in Europe with exclusive distribution rights for a lot of the A-List MI-brands covering most of the countries in Europe.

### About Studiologic

Studiologic released their first product in 1986. The STUDIO 88 was a pioneer in a new segment of digital musical instruments: the Masterkeyboard. Followed by the famous SL-990 XP and SL-990 Pro master Keyboards, Due to their expertise in development and manufacturing of world-class keybeds, Studiologic quickly gained reputation among the best musicians and recording studios in the world. The current product range includes Stage Pianos, MIDI Controller, Synthesizers and of course the highly acclaimed SL-Master Keyboards.
