Sound Service European Music Distribution is now exclusively distributing the products of the American company Studio Electronics throughout Europe.

Studio Electronics is an american manufacturer of premium quality analog rackmount-synthesizers, desktop-synthesizers, eurorack modules and modular systems. Founded in 1981 by partners papa Val St. Regis and multi-platform design Guru Tim Caswell, Studio Electronics released their first monophonic, programmable, discrete "Premium Quality Analog" synth, the SE-1, in 1989. At Superbooth 21, Sound Service introduced the new SE-3X to the european market.

The SE-3X will be shipping in December 2021.

Content of this Press Release:

- About Studio Electronics
- The Studio Electronics Product Range
- Studio Electronics Mission Statement

Berlin, 22nd of November 2021 – Studio Electronics manufactures and designs premium quality analog products: Rackmount and desktop synthesizer, eurorack modules and systems, Class-A Audio, complicated stompboxes, and custom work when the spirit moves us. At Studio Electronics, artists, producers, designers, manufacturers—creatives, and the dynamic partnerships we create together matter most; they enable and nurture mutual success. This core belief, present at the 1981 founding of S. E. by partners papa Val St. Regis and multi-platform design Guru Tim Caswell (at the old Sunset 'n' Gower S.I.R. Rehearsal Studios in Hollywood), remains our guiding force. Val's sons Greg and Marc joined the team in 1985 and 1989 respectively, and ultimately (to radically jump cut) the first monophonic, programmable, discrete "Premium Quality Analog" synth, the SE-1, was born. Since then Studio Electronics, under the direction of Analogia Inc., has shaped and maintained the continuity and vibrancy of Analog Synth design and manufacturing worldwide by creating and shaping potent Analog sound with enduring value, and allowing for an essential give-and-take between our business partners, customers, and friends. We've found this to be nothing short of a transformational experience, and one in which Mary St. Regis (mom) shared and contributed vibrantly and generously as well—who could forget her voice and love?

PRESS RELEASE

The Studio Electronics Product Range

19" Rack Synthesizer

- SE-3X - The brand new SE-3X is the reincarnation of the legendary SE-1(X). The SE-3X is a pure analog, 3-voice paraphonic synthesizer with 4 different classic analog filters
- MIDIMINI V30 - The MIDIMINI V30 is the latest generation of the MIDIMINI - a semi-modular, monophonic, analog synthesizer with 14 Eurorack compatible patch points including CV & Gate
- SE-1X - The Classic. The SE-1X 2019 is a classic analog monophonic synthesizer with 3 oscillators and 2 different filter types. The SE-1X is the patriarch of the Studio Electronics analog sound: Just add your own musical structure to the mix, and Studio Electronics' Premium Quality Analog is yours to boom... and chase away the gloom.
- Code and Omega 8 - Our flagship products, specially equipped and built to customer specifications. Configurations with up to 8 voices are possible, various filter modules can be selected and much more. A real custom shop synthesizer.

Desktop Synthesizers

Boomstar is a return to the raw power and purity of non-programmable discrete analog, where STUDIO ELECTRONICS started in 1985. The Boomstar MKII is likely the ultimate desktop analog synthesizer for those who remember, and desire still, analog synth sounds that changed the music, and sound seekers who have yet to discover that electric magic and delight in their time—via MIDI or CV of course. Available in five different versions, each distinguished by the filter used:

- Boomstar 5089
- Boomstar 4072
- Boomstar MkII SEM
- Boomstar SE80 MkII
- Boomstar MkII 8106

Boomstar Modular

The BOOMSTAR MODULAR SYSTEM transfers our semi-modular BOOMSTAR desktop synthesizers into the popular Eurorack universe. It consists of 22 modules that dramatically expand the sound shaping, programming and modulation possibilities of the lush, potent and already flexible semi-modular Boomstar sound in unexpected ways. Available modules are as follows:

- Modstar Filter SE88 - CS80-Toned VCF
- Modstar Filter 5089 - Model D Toned VCF
- Modstar Filter SEM - Oberheim Toned VCF
- Modstar Filter 8106 - Juno to Jupiter Toned VCF
- Modstar Filter 4075 - ARP Toned VCF
- Charcot Circles - Touch Pad Digital Sequencer
- Mix4 - 4 in/1 Out Audio/CV Mixer
- Quadnic - 8bit Phase Distortion Oscillator
- VCA2 - Compact Dual VCA
- Slim0 8P - Oscillator Module
- Grainsy Clampit - Waveforms Granular/Phase Distortion Oscillator
- Sifi - Vintage Ringmod
- Oscillations - Model D-Toned VCO
- Shapers - Dual Adsr
- Levels - Dual Mixer/Attenuator

Tonestar

The Tonestar series contains complete synth voices and essentials for the Eurorack universe.

- Tonestar 2600
- Tonestar 8106
- Tonestar FOLKTEK'd
- Toolbar

More products

Designed specifically for the SE-02, the EXT Box is a multi-function external controller, offering high CV resolution filter frequency control with a full-sized knob.

About the Company Sound Service European Music Distribution

Founded in 1983, the Berlin based Sound Service European Music Distribution has been growing steadily from a one-product-distributor (MFB Fricke; the world's first digital drummachine) to one of the major independent german distribution companies for musical instruments recording studio equipment and PA, Lightning and DJ products. Today Sound Service is one of the leading distribution companies in Europe with exclusive distribution rights for a lot of the A-List MI-brands covering most of the countries in Europe.
